DETAILED ACTION

1. The request filed on July 22, 2005 for a request for continued examination (RCE) under 37 CFR 1.114 based on patent application 09/687543 is acceptable and an RCE has been established. Accordingly, **claims 1-21** have been examined.
2. **Independent Claims 1 and 21 and dependent claims 2, 4, 5, 9-13 and 15-20** have been amended.
3. **No new claims have been** added.

Allowable Subject Matter

4. **Claims 1-21** are allowed.
5. The following is an examiner's statement of reasons for allowance:
6. With respect to **the independent claims 1 and 21** the art on the record, in particular **Takenaka et al discloses all the limitation of the previous limitation of the independent claims before they were amended.** However, the art on the record namely Takenaka et al does not disclose or suggest the amended limitation. As applicant persuasively argued, the amended limitation recites the patentably distinct features of the present invention. **Features of the recording/reproducing apparatus according to the amended claims are a first storage means (Hard Disk) and a separate second storage means (ROM) for pre-storing a formula that is unique to the recording/reproducing apparatus.** Further features of the invention according to the amended limitation are the generation of a predetermined value and the transformation of the predetermined value based on the formula. **The transformed predetermined**

value is stored in the first storage means (Hard Disk). An advantage of the presently claimed invention that the data stored in the first storage means (Hard Disk) cannot be reproduced when the first storage means is moved to another apparatus, because the other apparatus has another pre-stored unique formula. As far as the main reference on the record, Takenaka et al, is concerned, the data stored in HDD can be reproduced when the HDD is removed from original apparatus and attached another apparatus. This reproduction possible because the secret key Takenaka et al. is produced based on machine specific information generated during the installation process and, the machine specific **information and the secret key are stored in the same HDD.** Furthermore, when the entire copyrighted data stored in the HDD of Takenaka et al. is copied to a blank HDD having the same specifications, the copied data can be reproduced resulting copyright violation.

None of the prior art of record taken singularly or in combination teaches such features. **Accordingly, the submitted amended independent claims are patentably distinct over Takenaka et al or other prior art.** Therefore, for the reasons provided above, the amended **independent claim 1 and 21 are allowed.**

7. The dependent claims, being further limiting to the independent claims, definite and enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
